

The previous months have shown us British, that our empire is not only not as powerful as it used to be, but also, that Germany has acquired a tremendous amount of power in return, definitely one that now rivals our own. The world is at war and the Germans already have the upper hand with the acquired control of some of the Nordic countries, parts of Poland, all of Czechoslovakia, and many other territories. This has happened because of the appeasement policies held by many countries in the West, which includes Great Britain, and this must be stopped. The Germans are planning to take over the entire continent and we must act as quickly as possible, they have been cutting our food shipments that come from the United States as well as Argentina and if they keep doing this our people will stop believing in us as the greatest nation and that could mean the end of us. We need to keep the morale of our people up so Britain does not fall and the Germans take control of all western Europe. As Lord President of the Council, the safety of the people is my upmost priority and to do just that the first thing that should be done is to stop German U-boats from destroying and sinking our shipments that come from the Americas and the only way to do it is to know exactly where they are at all times.

German leaders exchange codes and information utilizing the Enigma machine, a machine that codes important messages. All of our efforts must go to investigating how to crack the German codes and the only way of doing that is investing in the Government Code and Cypher School, more specifically on their section in Bletchley Park known as Hut 8 led by Alan Turing. This way we can crack the German codes and know each of the U-boat locations, thus letting us launch an attack on them destroying the submarines.

The Congress of the U.S has passed a reform that grants them neutrality but their participation in the war is going to make the greatest difference and will grant us, the Allies, an upper hand in the war. They have the Pacific to fight against Japan and the Atlantic to aid us with the sale of weaponry. But British economy is declining because of the war and we will need all of the money to provide centers for our people. Given the situation, we must persuade Franklin Roosevelt, the president of the U.S, to aid us by lending the British army weapons rather than selling them to us, thus involving them even more in the war. In order to make the U.S participate, some unconventional and controversial things might have to be done.

Germany's Luftwaffe certainly is strong but with the U.S on our side the only thing left to do is to mount an operation that uses the Royal Navy as well as the Royal Airforce and the navies of the Commonwealth countries at our disposal to launch an attack on Berlin. This way soldiers will enter Germany through the use of the navy and the planes will be able to bomb Berlin while the soldiers get there. In doing this we make sure we take over Germany and with an agreement that will be held by Britain, France and the U.S we will take control of Germany. After that, the countries that were previously controlled by Germany will regain their autonomy and will hopefully prosper.

In conclusion, the last few months have been a surprise for many, but right now our focus is the well-being of our people, and to make sure they are well we need to receive our food and weapon shipments. The aid of Hut 8 will be used to crack the German codes, and give us the location of the German U-boats to destroy them. Also, we must enter talks with the U.S convincing them to let us borrow their weapons, especially considering our economic decline because of the war. With these guns and the aid of the U.S as well as the aid of many of the Commonwealth Realms we will launch an attack on Berlin crushing the country and liberating those under their control. After, Germany will be forced to split and will be taken over by the U.S, France, and Britain in order to maintain peace and let us think of our next move. Helping our people and using

our resources throughout the world is the only way we will win this war, and we cannot afford to do anything but win it because the fate of the world depends on who ends up at the top after the war ends.
